

## Program - 2

Problem statement - Create a web page for display css in hyperlink.

sd => <!doctype html>

<html>

<head> <title> CSS Hyperlink </title> </head>

<style>

a: hover { color: Pink;

Background: Yellow; }

a: visited { color: Blue; }

a: Unvisited { color: Red; }

</style>

<body>

<h1> ABOUT COURSE </h1>

<table>

<th> Subject </th>

<th> information </th>

</th>

<td>

Programming languages

<ul>

<li> C++ </li>

<li> Java </li>

<li> C </li>

</ul>

</td>

<td> <pre>

```
<a href = "https://en.wikipedia.org/wiki/>click for </a>  
<a href = "https://en.wikipedia.org/wiki/c"> clic for c</a>  
<a href = "https://en.wikipedia.org/wiki/java">click for Java</a>  
</pre>
```

```
</td> </tr>
```

```
</table>
```

```
</body>
```

```
</html>
```
